Crop Report

Early wheat in the Champion district is showing well above ground and has reached the

ground and has reached the stooling stage.

The weather for the most part since last report has been very warm and dry, with high winds prevailing over a large part of the province, Soil drifting has done considerable damage in this district.

The warm spell of the pasthopper situation to a head very rapidly in the various threatened areas and the mence to the young crop growth is serious. The hoppers have hatched out two or three weeks carlier than last year and somewhat ahead of the crop and exearlier than last year and some-what ahead of the crop and ex-tensive damage is likely to be done by the pest in the next fow weeks from which the crop could not recover except through the medium of good rains and then only to a partial

extent.

The department therefore emphasizes the great necessity of poisoning operations. Ample supplies of balt are on hand at present at the various mixing stations, and the field organization is active in meetdemand for bait.

Precipitation since last report has varied from light to heavy has varied from light to heavy showers in various areas. In the Champion locality then has been little or no rain but north and south there have been showers varying in degree. Sheep men have reported an excellent lambing seas on. Prices for lambs at present are Prices for lambs at present are very good, and hog prices are maintaining a fairly satisfact-roy level also. There is a good market for horses, and farmers and ranchers having animals for sale have recently shipped numbers of them from the province.
